

NOTIFY – Account Monitoring

Let **Infolure NOTIFY** service alert you when one of your accounts has a negative status charge. Our **Advantage Database** contains national daily bankruptcy updates and weekly deceased filings. You simply provide **Infolure** with your Account File at intervals you select. We continuously match your accounts against our database. Alerts are sent to you on the schedule you specify (daily or weekly), via the medium you prefer. Several process options are shown below, or we can customize to meet your specific needs.

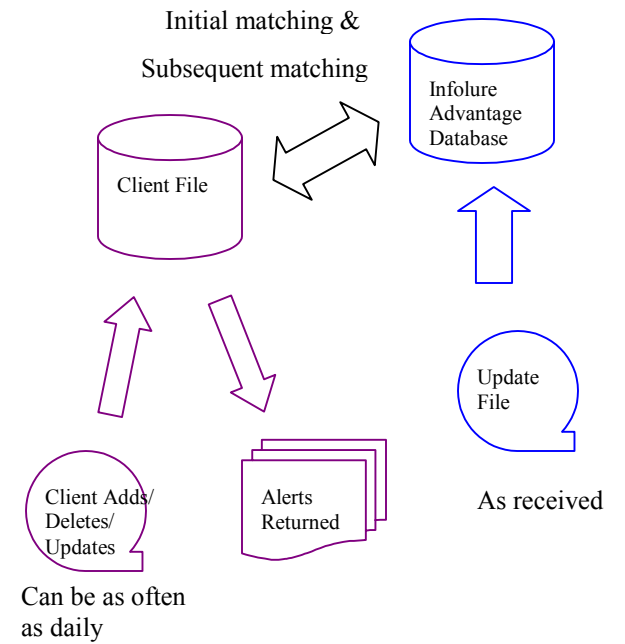

Method 1 – Specific time period notification

Method 2 – Perpetual notification, periodic replacement of Account File

Method 3 – Perpetual notification, we maintain a complete replica of your Account File with a custom process

Matched alerts are reported for a specified period of time. For example, adds and changes will be sent to you for 30, 60, 90, days, etc. off your initial file, for as long as you specify.

Distinction from Method 1: perpetual process rather than specific period of time. You maintain your Account File and provide us with a periodic update.

Distinction from Method 2: still a perpetual process but we maintain an exact, on-going duplicate Account File at Infolure for you.
